Objetive

Apply knowledge and experience that I have acquired along my life for obtain a position within a company and so achieve have a development achieving my goals and developing new abilities for be a better person with the society and my family.

Summary

I'm a strong, Microsoft certified professional developer (.NET) with 5 years experience in development client- server database-driven complex information systems with complicated GUI. I have thorough understanding of current and emerging Microsoft technologies and Development Lifecycle. I am ready to be deployed in a senior capacity as a developer or team leader. My broad range of experience in both team management and senior development makes me a strong candidate for a diverse set of positions.

Key skills

Core skills

- NET 4.5, C#, LINQ, SQL, XML, MultiThreading, COM, Design Patterns, MVC, Enterprise Library, GUI design, OOD, OOP

Web development

- ASP.NET MVC 4.0, HTML, DHTML, CSS, Javascript, Ajax, JQuery, WCF, XML/SOAP, Web Services, .NET Remoting, IIS

Windows development

- WPF, WinForms

Databases

- Ms SQL/T-SQL, Ms Access, Oracle, ORM: XPO, ADO.Net Entity Framework, Linq to Sql

IDE, Component tools

- Visual Studio 2012, Telerik

Development methodologies, related tolos

- RUP, SCRUM, UML, Team Foundation Server 2010, Ms Project Server, Sharepoint, IBM Clear case, Tortoise SVN

Others

- Windows Server 2008, Active Directory, VPN, Virtual machines

Relevant experience

HCL - Software Engineer

Jun 2013 - Today

Tools utilized:

- C# .NET 4.0, SQL, XML, HTML 5, CSS 3, Javascript, JQuery, TFS, Web Services, Ajax, ASP.NET, MsSQL 2008, RLEstudio

Responsibilities and activities:

- Technical design, coding, fixing bugs of internal workflow web application and one of the massive users web applications
- Analyzing and understanding project scope and objectives
- Development of web and mobile applications

Hildebrando - Senior .NET Developer

Aug 2012 - Jun 2013

Tools utilized:

- C# .NET 4.0, SQL, XML, HTML 5, CSS 3, Javascript, JQuery, Entity Framework, Windows, TFS, Web Services, MVC3, Ajax, ASP.NET, MsSQL 2008, IBM Clear Case

Responsibilities and activities:

- Technical design, coding, fixing bugs of internal workflow web application and one of the massive users web applications
- Analyzing and understanding project scope and objectives

- Integrating of implemented components with existing systems
- Designing user interface
- Code review
- Development of web and mobile applications

Jabil Circuit – Business analyst / Lead .NET Developer

Jan 2011 – Jul 2012

Tools utilized:

- C# .NET 3.5, LINQ, Web Services, XML, ASP.NET, HTML, CSS, javascript, jquery, ajax, IIS, MsSQL 2008, Business Intelligence, analysis services

Responsibilities and activities:

- Analyzing requirements, technical design and development áreas, customizing development process, work item types, workflows, build definitions.
- Managing developers, interviewing candidates, system analisys, writing technical documentation, code review
- Project management, requirement management, task management, follow-up activities.

Jabil Circuit - .NET Developer

Jan 2009 – Jan 2011

Tools utilized:

- C# .NET 3.5, LINQ, Web Services, XML, ASP.NET, HTML, CSS, javascript, jquery, ajax, IIS, MsSQL 2008, Business Intelligence, analysis services

Responsibilities and activities:

- Development of client application modules (ASP.NET) and server-side logic, data-management services (including data model, sql-stored procedures) and communication services
- Designing system architecture, writing technical requirements and specifications
- Implementation by designed specification, fixing bugs, writing stored T-SQL procedures designing database, code refactoring (C#, T-SQL, VBA), developing report modules
- Implementing intranet web portal based on Sharepoint Portal 2007
- Design and development of GUI, components (Editable Ajax Grid)

Jabil Circuit - Junior .NET

Mar 2008 – Jan 2009

Tools utilized:

- C# .NET 2.0, ASP.NET, HTML, CSS, javascript, IIS, MsSQL 2005, Business Intelligence, analysis services

Responsibilities and activities:

- Improving GUI, system design, implementing composite-approach for GUI design
- Implementing 3rd party components and controls (like telerik) as well as fully
- Development of desktop and web applications.

Courses

MCP: .NET Web Based Client Development (Ms70-528)

2009

- Gives qualification of Microsoft Technology Specialist. Approves .NET Web application development skills

MCP: .NET Windows Based Client Development (Ms70-526)

2009

- gives qualification of Microsoft Technology Specialist. Approves .NET Windows application development skills

Analyzing requirements and defining Microsoft.NET solution architectures

2011

- 5 days. Studing Microsoft Solution Framework methodology

Enterprise project management using PMI & Microsoft Project

2011

- Project management basics by PMBoK
- Ms Project Professional 2007
- Ms Project Server 2007 for enterprise

CIIEC Course – Data centers

2012

- Design and administration

Languages

English – TOEIC certificate

2010
